

RAV Counsel Meeting Preparation

Prepared: 2026-05-12 **Meeting purpose:** Walk through deployed compliance state, get counsel sign-off on verbatim disclaimer text + architectural choices, capture decisions on 12 open questions.

Companion docs: `attorney-meeting-compliance-status.md` (Part 5 two-column status), `compliance-gap-analysis.md` (Part 4 priority gaps), `_extracted_legal_dossier.txt` (research memorandum). **Audience:** RAV founders + counsel.

1. TL;DR — what we did and what we need from you

In the 6 days between the 2026-05-05 audit and this meeting we shipped **all 12 build-now compliance items** from the audit:

- All **8 mandated disclaimers** from Legal Dossier § VIII deployed across the platform via a central registry (homepage, footer, listing pages, Terms of Service, About page, Checkout, Booking Confirmation page, booking-confirmation email).
- **Pay Safe / Stripe destination-charge** architecture documented in code + tests; Disclaimer 8.8 explicitly names both Stripe (the licensed processor) and Pay Safe (RAV's customer-facing brand).
- **9 Postgres migrations** (074–079, plus a Session-63 backlog cleanup) applied to **DEV + PROD**: state column on listings, marketplace-facilitator registration tracker, active-duty-military self-disclosure, listing-accuracy reports, fraud reports, CC&R attestation.
- **Three new product surfaces** with anti-misrepresentation case-law in mind: Guest Protection Policy (full refund within 5 business days of Host cancellation within 30 days of check-in), Listing Accuracy Reporting (Palmer v. FantaSea, 2025), Fraud Reporting (FTC v. Carroll, 2026).
- **MLA arbitration carve-out** in Terms § 9 (Steines v. Westgate Palace, 11th Cir. 2024) — universal, regardless of whether the user self-identifies as active-duty.
- **`robots.txt` + Terms § 7.1 Automated Access clause** — explicit allowlist for major search engines + CFAA citation for unauthorized scrapers.

What we need from you, ranked by impact on platform launch:

Priority	Decision	Why it matters
P0	Written opinion that Pay Safe / Stripe destination-charge satisfies FL § 721.08, CA B&P § 10145, HI § 514E-9 (counsel question C1)	If yes, no state escrow license needed → launch unblocked in 50 states. If no, we need to re-architect payments before opening to renters.

P0	Approve or revise the verbatim text of Disclaimers 8.1–8.8 + trademark (counsel question C9)	Triggers <code>legalReviewRequired: false</code> flip across the registry (#494).
P0	Confirm RAV doesn't need a real estate / rental broker license in FL, CA, HI, NV, AZ for rental-only listings (counsel question C3)	If license required, materially changes onboarding scope.
P1	CA-specific disclosure verbatim text (counsel question C10)	One registry entry away from rendering live on every CA listing.
P1	Host-type classification thresholds — Type 1 / 2 / 3 cutoffs by properties + rentals (counsel question C4)	Drives the next compliance push: rental-frequency monitoring + commercial-threshold flagging.
P2	Stripe Identity vs Stripe Connect KYC sufficiency (counsel question C2)	Determines a 1-2 day integration scope.
P2	Acceptable timeshare-ownership proof types per state (counsel question C6)	Drives schema for an <code>owner_timeshare_ownerships</code> table.
P2	State-level licensing gate behavior — hard-block vs soft-warn (counsel question C5)	Behavioral choice for the (yet-to-be-built) commercial-threshold gate.
P3	Marketplace-facilitator registration order — which states to register in first (counsel question C7)	Fills in values in the admin tab we already deployed.
P3	MLA carve-out language confirmation (counsel question C11)	Currently a single registry / Terms edit if revised.
P3	Recent-legislation effective-date prioritization — FL HB 1537, CA AB 2992, HI SB 3090, etc. (counsel question C12)	Some are already in effect; we need to know which gates are loose.
P3	8 policy drafts at <code>docs/support/policies/*.md</code> (<code>status: draft</code> , blocked on #80) — does counsel draft or review founder drafts? (counsel question C8)	Unblocks Privacy Policy + final ToS substantive content.

2. Suggested meeting agenda (90 minutes)

Time	Topic	Doc to display
------	-------	----------------

0:00– 0:10	Welcome + framing: this is mostly a review, not a design session — code is shipped, awaiting your sign-off	this doc
0:10– 0:25	Pay Safe architecture walkthrough (C1) — the biggest single decision	docs/payments/PAYSAFE-COMPLIANCE.md + Migration 068 + 069
0:25– 0:40	The 8 mandated disclaimers (C9) — verbatim text vs deployed text	attorney-meeting-compliance-status.md § 2.3
0:40– 0:55	Marketplace-facilitator licensing for rental-only platforms (C3) — FL, CA, HI, NV, AZ	_extracted_legal_dossier.txt § II + IV
0:55– 1:10	Host-type classification thresholds (C4) + state licensing gate behavior (C5)	this doc § 6
1:10– 1:20	Recent legislation effective dates (C12) — FL HB 1537 in effect since 2026-01-01	_extracted_legal_dossier.txt § V
1:20– 1:30	Action items + post-meeting timeline	this doc § 8

Items **C2, C6, C7, C8, C10, C11** can be handled async over email if time runs out.

3. What is deployed today — feature map

Status legend: ✓ Deployed & tested · ● Deployed pending counsel sign-off · ⌚ Counsel-pending (no code yet)

3.1 Disclaimer system

Disclaimer	Required placement (per Legal Dossier § VIII)	Where it lives in code
8.1 Marketplace Disclaimer	homepage, footer, listing pages	● Footer + Index + PropertyDetail (verbatim text from registry; counsel sign-off pending)
8.2 No Timeshare Sales	homepage, listing pages, header/footer	● Footer + Index + PropertyDetail (verbatim)
8.3 Non-Broker / Non-Agent	Terms of Service, About page	● Terms.tsx § 2 + new About page
8.4 Tax Disclosure	Checkout, booking confirmation	● Checkout + BookingSuccess + booking-confirmation email

8.5 Cancellation & Refund	listing pages, Checkout, booking confirmation	● PropertyDetail + Checkout + BookingSuccess + email
8.6 Limitation of Liability	Terms of Service	● Terms.tsx § 8 (replaced wrong generic intermediary text)
8.7 Florida-Specific	FL listing pages, FL checkout (geo-targeted)	✓ Renders live on FL listings via <code><StateSpecificDisclaimer /> + listings.state</code> column
8.8 Escrow / Fund-Holding	payment flow, checkout, booking confirmation	● Checkout + BookingSuccess + email; substitution: Stripe (the "Pay Safe" service)
Trademark / Affiliation	footer	● Footer (migrated from inline anti-pattern to registry)
CA-Specific (8.7-CA)	CA listing pages, CA checkout	⌚ Wiring complete; registry entry awaits your verbatim text (C10)

Architecture: All disclaimer text lives in **one file** — `src/lib/disclaimers/registry.ts`. Every placement renders via `<DisclaimerBlock id="..." />`. A drift-detection test asserts the edge-function mirror (`supabase/functions/_shared/disclaimers.ts`) is byte-identical. **A counsel-driven text revision is a one-line edit** that propagates to all locations + the booking-confirmation email.

3.2 Payment + escrow (Pay Safe)

Requirement	Where it lives
Fund segregation — Guest funds never enter a RAV bank account	✓ Stripe Connect destination-charge in <code>supabase/functions/process-escrow-release/handler.ts:262-273</code> ; documented in <code>docs/payments/PAYSAFE-COMPLIANCE.md § 2</code>
Disbursement after check-in	✓ 5-business-day hold via <code>system_settings.escrow_hold_period_days</code> (Migration 068); <code>auto-confirm-checkins</code> cron (Migration 073)
Refund processing — within 5 business days for Host cancellation	✓ <code>stripe.refunds.create</code> called immediately on Host cancellation in <code>process-cancellation/handler.ts:130-163</code>
Disclaimer 8.8 verbatim	● Deployed at Checkout / BookingSuccess / email
Guest Protection Policy surface	● <code>/guest-protection</code> page + badge on listings + banner above Pay button

3.3 Listing creation safeguards

Requirement	Where it lives
-------------	----------------

"No Timeshare Sales" validation	✓ <code>src/lib/listingValidation/noSales.ts</code> blocks 16 sale-language phrases; wired into <code>ListProperty.tsx</code> submit
State field on listings	✓ Migration 074 + form wiring; backfilled from <code>resort.location.state</code>
Owner attestation — reservation genuine	✓ Existing checkbox (pre-Session 66)
CC&R attestation — resort/HOA permits rental	✓ Migration 079 + required checkbox in ListProperty (new Session 66 — 2026-05-04 review gap closed)
FL-Specific Disclosure on FL listings	✓ Live

3.4 Consumer protection surfaces

Requirement	Where it lives
Guest Protection Policy	● <code>/guest-protection</code> page + GuestProtectionBadge component on PropertyDetail + Checkout banner
Pre-booking listing-accuracy reporting (Palmer v. FantaSea)	● <code><ListingAccuracyReportDialog /></code> from PropertyDetail; admin queue at <code>/admin → Accuracy reports</code> tab; anon submissions allowed; Migration 077
Fraud reporting (FTC v. Carroll)	● <code><FraudReportDialog /></code> from Footer + PropertyDetail; senior-admin-only queue at <code>/admin → Fraud reports</code> tab; Migration 078
MLA arbitration carve-out	● Terms § 9 carve-out paragraph (universal, applies regardless of self-disclosure); conditional <code><MLANotice /></code> at Checkout for self-identified servicemembers; Migration 076
Automated access / scraping policy	● <code>public/robots.txt</code> explicit allowlist + Terms § 7.1 with CFAA citation

3.5 Tax + jurisdictional

Requirement	Where it lives
Stripe Tax calculation engine	✓ Wired (<code>STRIPE_TAX_ENABLED</code> env flag, default OFF); flips ON when LLC/EIN (#127) lands
Tax line item at checkout (8.4 verbatim)	● Deployed
Marketplace-facilitator registration tracker	✓ Migration 075 + <code>AdminMarketplaceRegistrations</code> admin tab seeded with 51 jurisdictions; values fill in per C7 decision

Geo-targeted FL disclosure	✓ Live
Geo-targeted CA disclosure	⌚ Wiring complete; awaits C10 text

3.6 Identity, host classification, monitoring

Requirement	Where it lives
Identity verification	● Stripe Connect Express KYC for every Host (<code>owner_verifications.kyc_verified</code>); see C2 — Stripe Identity needed in addition?
Active-duty servicemember self-disclosure	✓ Migration 076 + signup checkbox; Terms carve-out applies universally
Host type classification (Type 1/2/3)	⌚ Not built — needs C4 thresholds + C5 gate behavior first
Rental-frequency / commercial-threshold monitoring	⌚ Not built — depends on <code>host_type</code> column above
License-number collection + display	⌚ Not built — needs C3 which states require which credentials
Resort ownership verification (deed / membership cert)	⌚ Not built — needs C6 acceptable proof types

4. The 12 counsel questions in detail

C1 — Does Pay Safe / Stripe destination-charge satisfy FL § 721.08, CA B&P § 10145, HI § 514E-9?

Why we're asking: The audit flagged escrow / trust-account requirements as the single highest-risk compliance area. Our architectural answer was the Pay Safe service: RAV never holds Guest funds in a RAV-controlled bank account. Stripe (a licensed payment processor) collects, holds, and disburses on RAV-controlled timing. Documented in `docs/payments/PAYSAFE-COMPLIANCE.md`.

Code reference: `supabase/functions/process-escrow-release/handler.ts:262-273` — `stripe.transfers.create({ destination: owner.stripe_account_id, ... })`.

What we're asking for: A short written opinion that this architecture (Stripe destination-charge + 5-business-day hold + check-in-confirmation trigger + admin payout-hold capability) satisfies the trust-

account requirements in those three states **without RAV obtaining its own escrow license.**

Risk if "no": Major re-architecture — RAV would need to obtain escrow licensing in each state or change payment processor. **Risk if "yes":** None — current architecture continues. We'd land the written opinion into `PAYSAFE-COMPLIANCE.md` as the counsel-handoff record.

RAV's recommended position: This satisfies the requirements; RAV is a marketplace facilitator using a licensed third-party processor. The Compliance Brief Part 6 ("What NOT to Over-Engineer") explicitly says the platform should not implement escrow management directly.

C2 — Stripe Identity (dedicated) vs Stripe Connect Express KYC (current)?

Current state: Every Host completing Stripe Connect Express onboarding hits Stripe's KYC flow. Government ID is collected by Stripe and surfaced to RAV as `profiles.stripe_charges_enabled = true`. RAV stores this state but does not directly handle ID documents.

The audit flagged this as Partial: Stripe Connect KYC is payment-side identity verification, not platform-level identity verification. The Compliance Brief recommends a dedicated provider (Stripe Identity or Persona).

Decision: Is Stripe Connect Express KYC sufficient for the compliance posture we want, or do we need to layer Stripe Identity / Persona on top?

Risk if "Connect is enough": None today; we close the audit item. If a state regulator later demands more, we add Stripe Identity then. **Risk if "need dedicated":** 1-2 day integration + new admin surface + listing-creation gate.

RAV's recommended position: Stripe Connect Express KYC is sufficient pre-launch; revisit at first regulatory contact.

C3 — Real estate / rental broker license required in FL, CA, HI, NV, AZ for rental-only platforms?

Statutes named in Legal Dossier § II–IV:

- FL § 721.20 ("timeshare resale brokers" — rental-only platforms may qualify for an exemption)
- CA B&P § 11003.5 + DRE oversight (if platform "negotiates or solicits on behalf of owners")
- CA B&P § 17550 Seller-of-Travel registration (separate consideration)
- HI Chapter 514E ("timeshare plan operators" — rental platforms may be covered)
- NV NRS 119A.285 (timeshare marketing)
- AZ ARS § 32-2197 (timeshare sales agents)

RAV's posture: Marketplace facilitator that does NOT negotiate terms, NOT act as agent, NOT hold out as licensed broker. Direct host-to-guest contracting; RAV's fee is a platform fee, not a transaction

commission.

Code/copy evidence we can point to:

- Disclaimer 8.3 (Non-Broker / Non-Agent) in Terms + About
- "No Timeshare Sales" validation on listing creation (#485)
- Disclaimer 8.2 across all required locations
- About page positioning (`src/pages/About.tsx`): "we facilitate, do not own, do not negotiate"

Decision: Per-state — does RAV need a license for rental facilitation activity?

RAV's recommended position: No, based on the marketplace facilitator model. We'd like written confirmation for each of the five Required-tier states.

C4 — Type 1 / Type 2 / Type 3 Host classification thresholds?

Compliance Brief Part 2 proposed thresholds:

- Type 1 Casual: 1 property, 1–4 rentals/year
- Type 2 Multi-Property: 2–5 properties
- Type 3 Commercial: 6+ units or operating as a business

Why this matters: Type 3 hosts almost certainly require a license in the Required-tier states (per **C3**). RAV's compliance gate behavior depends on knowing where the line falls.

Decision:

- Are the proposed thresholds correct?
- Should they vary by state? (FL might use 6 units, NV might use 3 — we don't know without counsel)
- Should we add a "Type 0" (casual single owner) tier with no compliance burden at all?

Engineering impact: Trivial — change the threshold constants. The schema (`profiles.host_type` enum + `properties_owned` + `annual_rentals_planned`) is the same regardless.

C5 — State-level licensing gate behavior?

Once we have C3 + C4 answered, we need to decide how `ListProperty.tsx` behaves when a Type 3 Host attempts to list in a Required-tier state without license documentation.

Options:

1. **Hard block** — refuse the listing submission until license docs uploaded.
2. **Soft warn** — show a yellow banner, allow submission, queue for manual admin review.
3. **Allow + flag** — submit normally, admin queue gets a "needs license verification" flag.

Trade-offs:

- Hard block protects RAV but may push users to other platforms.
- Soft warn keeps the funnel intact but exposes RAV if a renter sues.
- Allow + flag is a compromise but inherits the most exposure.

RAV's recommended position: Hard block in Required-tier states; allow + flag in Conditional states (AZ, IL, NY); ignore in Monitor states.

C6 — Acceptable timeshare-ownership proof types?

Current state: RAV verifies *reservation proof* (Pre-Booked confirmation number + uploaded confirmation email, Migration 064) but **does not verify ownership of the underlying timeshare interest**.

Compliance Brief Part 3 §3.1 calls this out: "Resort ownership verification — Does the platform verify the Host actually owns the timeshare interest they are listing? This is the single most important fraud prevention measure."

Possible proof types:

- Deed copy (real-estate-deeded timeshares like Marriott legacy weeks)
- Membership certificate (points-based programs like DVC, Wyndham Club Wyndham)
- Annual statement showing points balance
- Resort confirmation letter naming the owner
- Resort API integration (none of the major chains expose one publicly)

Decision: Which types of proof should RAV accept, and does the answer differ by state?

Risk of doing nothing: If a host lists a stay they don't own, RAV inherits exposure under *Palmer v. FantaSea* (2025) reasoning even with our new accuracy-reporting flow.

C7 — Marketplace-facilitator registration order?

We deployed the admin tab at `/admin → Tax registrations` (Migration 075). The table is seeded with all 50 states + DC, every row at `registration_status = 'not_required'`.

Decision: Which states require RAV to register as a marketplace facilitator, in what order, and with what timeline?

The compliance brief notes "40+ states" — we need the actual list to populate the admin tab. RAV staff + a tax pro can fill these in once counsel confirms the legal answer.

Engineering impact: Zero — operational data entry only.

C8 — Counsel-drafted vs counsel-reviewed for the 8 policy drafts?

8 policy documents sit at `docs/support/policies/*.md` with frontmatter `status: draft`, all blocked on issue #80:

1. `privacy-policy.md`
2. `booking-terms.md`
3. `payment-policy.md`
4. `trust-safety-policy.md`
5. `insurance-liability-policy.md`
6. `subscription-terms.md`
7. `refund-policy.md` (already at `status: active` but counsel should still review)
8. `cancellation-policy.md`

Decision: Will you draft these, or review founder drafts? If we draft, will you mark up or rewrite?

Risk if neither: These are required pre-launch artifacts. Privacy Policy in particular has CCPA / GDPR implications that need a lawyer's eye.

C9 — Are Disclaimers 8.1 – 8.8 approved as-is?

Every disclaimer in `src/lib/disclaimers/registry.ts` carries:

```
legalReviewRequired: true,  
reviewedBy: null,  
reviewedDate: null,
```

The verbatim text is what's in **Legal Dossier v3 Section VIII**. We assume that text is yours — but the dossier's banner says "memorandum prepared by the Rent-A-Vacation founding team to facilitate legal review." So we want explicit sign-off.

Decision per disclaimer: Approve as-is / approve with edits / rewrite.

Mechanics: Approval triggers one PR (#494) that flips `legalReviewRequired: false`, sets `reviewedBy: "<your name / firm>"`, `reviewedDate: <meeting date>` across all 9 entries (8 mandated + trademark). Any text revisions: same PR bumps `version`, edits text in both source registry + edge-function mirror, drift test passes.

C10 — CA-Specific Disclosure (8.7-CA) verbatim text?

Wiring is complete. `STATE_DISCLAIMER_MAP.CA` → `"8.7-CA".<StateSpecificDisclaimer />` renders nothing today because the registry intentionally omits the `8.7-CA` entry.

What's needed: Verbatim disclosure text appropriate for CA-listed timeshare rentals (parallel to 8.7 for

FL). Should it cite CA B&P §§ 11003.5 / 10145 / 17550? Should it disclaim Seller of Travel registration status (or affirm it)?

Engineering impact: One registry entry + matching email-mirror entry. Tracked in #493.

C11 — MLA carve-out language confirmation?

Current Terms § 9 paragraph:

Military Lending Act Carve-Out. For active-duty servicemembers of the U.S. Armed Forces and their dependents (as defined in 10 U.S.C. § 987 and 32 C.F.R. § 232), the arbitration provision above is not enforceable. Such users retain the right to pursue any dispute arising out of or relating to these Terms in a court of competent jurisdiction. This carve-out reflects the holding of *Steines v. Westgate Palace*, 11th Cir. (2024), and applies regardless of whether the user has self-identified as a servicemember to Rent-A-Vacation.

Decision: Approve as-is or rewrite. One-paragraph edit in `Terms.tsx` if revised.

C12 — Recent legislation prioritization?

Legal Dossier § V lists 8 items effective 2025-09-01 through 2026-07-01:

Jurisdiction	Bill	Effective	Status
Florida	HB 1537 — Timeshare Rental Disclosure Act	2026-01-01 (in effect)	Display owner license status — needs C3 answer first
California	AB 2992 — Short-Term Rental Marketplace Accountability	2026-07-01 (upcoming)	Marketplace facilitator extension + host identity verification
Hawaii	SB 3090 — TAT Modernization	2026-01-01 (in effect)	TAT to 10.25%; quarterly remittance by marketplace facilitators — feeds C7
Nevada	SB 440 — Timeshare Rental Registry	2025-10-01 (in effect)	Voluntary registry; safe harbor from broker licensing
New York	A 8421 — Short-Term Rental Registration	2026-01-01 (in effect)	Hosts must register with local municipalities
Texas	HB 3821 — Marketplace Facilitator Lodging Tax	2025-09-01 (in effect)	Marketplace facilitators must collect + remit hotel tax
Illinois	SB 2294 — Chicago STR Ordinance	2026-03-01 (in effect)	Increased platform liability for unregistered Chicago listings

Colorado	HB 24-1175 — Short-Term Rental Enforcement	2026-01-01 (in effect)	Platforms must remove listings lacking local registration numbers
----------	--	------------------------	---

Decision: Which of these does RAV need to act on first? NV SB 440 (registry safe harbor) seems like an easy win. FL HB 1537 ties into C3.

5. Risk register — open items

#	Risk	Severity	Mitigation in flight
1	Counsel hasn't reviewed verbatim disclaimer text	Medium	Counsel meeting agenda § 2; flip via #494
2	No host-type classification → cannot enforce commercial thresholds in FL/CA/HI/NV/AZ	Medium	Awaiting C4 thresholds; schema + cron infrastructure ready
3	No timeshare-ownership verification (only reservation proof)	Medium	Awaiting C6 acceptable proof types
4	Stripe Tax not actually collecting (env flag OFF)	Low (current); High (at launch)	Activates with LLC/EIN (#127); no engineering work needed
5	8 policy drafts unreviewed	Medium	Awaiting C8 counsel commitment
6	CA-Specific Disclosure not rendering	Low	Wiring done; one registry entry away (C10)
7	PROD push has Studio-vs-CLI drift on pre-Session 63 migrations	Low (CLI now in sync)	Cleared this session; future migrations always go through CLI
8	RAV could attract a Palmer-style lawsuit	Medium pre-launch; Low post-launch	Listing-accuracy reporting flow deployed (#491); investigation SOP needed (depends on C8 trust-safety-policy.md review)

6. Where the platform sits in 50-state risk tier

Per Legal Dossier § IV:

- **Required (high-scrutiny) — 5 states:** FL, CA, HI, NV, AZ. Current state: deployed the 8.7 FL disclosure live; CA wiring awaits **C10**; HI/NV/AZ need **C3** licensing answer.
- **Conditional — 3 states:** AZ (TPT + ARS § 32-2197), IL (Chicago hotel tax), NY (NYC hotel

+ RPL § 442 broad-broker-def).

- **Monitor — rest.** No special handling beyond marketplace-facilitator tax obligations (handled via the new admin tab after **C7**).

7. Pay Safe / Stripe architecture — quick reference for the meeting

```
Renter pays → Stripe (RAV's platform account) → holds for 5 business days
      ↓
    Check-in occurs
      ↓
Auto-confirm cron OR renter confirms
      ↓
stripe.transfers.create({
  destination: host.stripe_account_id,
  amount: owner_payout,
  ...
})
      ↓
Stripe pays Host's connected account
```

Key facts to confirm with counsel:

- RAV never sees the money in a RAV-controlled bank account
- Stripe is the licensed payment processor / money transmitter
- The 5-day hold is RAV-controlled *timing* on a transfer Stripe is otherwise ready to make — it's a product feature, not a custodial action
- Admin can extend the hold (escrow_hold_period_days in system_settings) or hold indefinitely (manual admin hold)
- Disputes pause the auto-release
- Documented in docs/payments/PAYSAFE-COMPLIANCE.md (counsel sign-off goes into § 7 placeholder)

8. Post-meeting checklist

Immediately after the meeting:

- [] Capture counsel decisions on C1–C12 into this doc (or a transcribed counsel-notes.md)
- [] Update docs/payments/PAYSAFE-COMPLIANCE.md § 7 with counsel's written opinion on C1
- [] File a focused follow-up PR for #494 (flip legalReviewRequired: false + add reviewedBy / reviewedDate to each of the 9 registry entries; if any text was revised, bump versions and update email-mirror in lock-step)

- [] File #493 PR (CA-specific disclosure verbatim text) if C10 returned text
- [] If C4 + C5 returned answers: file follow-up issue to build host-type classification + commercial-threshold cron (engineering ~2 days)
- [] If C6 returned answers: file follow-up issue to build timeshare-ownership verification flow
- [] If C7 returned values: RAV staff + tax pro fill in marketplace-registration admin tab
- [] If C8 returned counsel-drafted policies: replace the 8 drafts at `docs/support/policies/*.md`, flip status: draft → active, push via `sync-support-docs.yml`
- [] Update `docs/legal/attorney-meeting-compliance-status.md` to reflect counsel decisions (flip  →  where signed off)

9. Documents to bring to the meeting

Doc	Why
<code>docs/legal/_extracted_legal_dossier.txt</code> (or the original PDF)	Reference for the research + verbatim disclaimer text
<code>docs/legal/attorney-meeting-compliance-status.md</code> (+ PDF)	Part 5 two-column status — quickest visual proof of what's deployed
<code>docs/legal/compliance-gap-analysis.md</code> (+ PDF)	Priority breakdown by Immediate / Pre-Launch / Post-Launch
<code>docs/legal/counsel-meeting-prep.md</code> (this doc, + PDF)	Agenda + decision matrix
<code>docs/payments/PAYSAFE-COMPLIANCE.md</code>	Architectural answer for C1
GitHub Issues — umbrella #480	Live status of all 12 build-now items

End of document — Version 1.0 — 2026-05-12
