RAV Compliance Status — Attorney Meeting Document

Prepared for: legal counsel review **Source documents:** *Legal Research Memorandum v3* (`Legal_Dossier_RentAVacation_v3.pdf`) + *RAV Compliance Development Brief v1.0* (`RAV_Compliance_Brief_for_Claude_Agent.pdf`) **Audit date:** 2026-05-05 **Audit scope:** `dev` branch (the branch we ship from), Sessions 33–63 **Audit method:** Seven parallel codebase subagents — one per Part 3 domain — cross-referenced against `docs/PROJECT-HUB.md`, `docs/COMPLETED-PHASES.md`, `docs/PRIORITY-ROADMAP.md`, `docs/LAUNCH-READINESS.md`, `docs/PLATFORM-INVENTORY.md`, `docs/payments/PAYSAFE-COMPLIANCE.md`, `docs/payments/PAYSAFE-FLOW-SPEC.md`, and current GitHub Issues **Implemented bar:** code present + at least one test + functionally correct + (for disclaimer text) verbatim from Legal Dossier Section VIII. Anything weaker = **Partial**. Anything missing = **Gap**.

---

1. Executive scoreboard

Domain	Implemented	Partial	Gap
3.1 Host Onboarding & Credentialing	0	2	2
3.2 Listing Creation & Display	0	1	3
3.3 Payment & Escrow	3	0	1
3.4 Tax Collection & Remittance	0	3	1
3.5 Disclaimer System (8 disclaimers)	0	3	5
3.6 Consumer Protection & Guest Safety	0	0	4
3.7 Rental Frequency / Threshold Monitoring	0	0	7
Totals	**3**	**9**	**23**

Architectural strengths counsel should note:

- **Pay Safe = Stripe destination-charge model** is already in production code (`process-escrow-release/handler.ts:262-273`, `create-stripe-payout/handler.ts:156`). RAV never holds Guest funds in a RAV-controlled bank account — funds sit in Stripe's custody from charge through transfer-to-Host. This is the architecture explicitly designed to avoid the trust-account licensing burden in FL § 721.08, CA B&P § 10145, and HI § 514E-9. Documented in `docs/payments/PAYSAFE-COMPLIANCE.md` and `docs/payments/PAYSAFE-FLOW-SPEC.md` (DEC-038, DEC-039).
- **5-day post-checkout escrow hold + check-in confirmation** is implemented via

configurable `system_settings.escrow_hold_period_days` (Migration 068) plus the `auto-confirm-checkins` cron (Session 63 closed 7 of 9 PaySafe gaps).

- **Stripe Tax integration is wired** end-to-end behind the `STRIPE_TAX_ENABLED` env flag (`create-booking-checkout/handler.ts:247`); activation is gated only on issue #127 (LLC/EIN formation), not on engineering work.
- **Stripe Connect Express KYC** runs for every Host (`owner_verifications.kyc_verified`), but counsel should advise whether this satisfies the platform-level identity-verification requirement or whether dedicated Stripe Identity / Persona is needed in addition.

Highest-risk findings counsel should address first:

1. **0 of 8 mandated disclaimers** are Implemented. 5 are entirely missing from UI; 3 are present but non-verbatim or incomplete. There is no central disclaimer registry — current disclaimers (e.g., trademark/affiliation in `Footer.tsx`, PR #479) are inline.
2. **No "no timeshare sales" enforcement** on listing creation — no keyword validation on title/description, no server-side check.
3. **No state field on the `listings` table**, so geo-targeted FL/CA disclosures (Disclaimers 8.7 + CA equivalent) are architecturally impossible today.
4. **No MLA notice or arbitration carve-out** for active-duty servicemembers (zero matches for "Military Lending"/"servicemember"/"active duty"/"10 U.S.C. § 987" anywhere in the codebase, including Terms of Service).
5. **Limitation-of-liability text in Terms of Service is wrong** — current `Terms.tsx:115-122` says "we are not responsible…" generic intermediary language. Legal Dossier 8.6 requires a 12-month-platform-fee cap with no consequential/punitive damages.
6. **No host-type classification** (Type 1 Casual / Type 2 Multi-Property / Type 3 Commercial) — the architecture for differentiating casual owners from commercial operators does not exist; therefore no license-collection workflow, no commercial-threshold flagging, no state-level licensing gate for FL/CA/HI/NV/AZ.

---

2. Part 5 — Two-column compliance status

> **Legend:** ✓ Implemented = code + test + correct + (for disclaimers) verbatim ◍ Partial = code present but missing tests, partial coverage, paraphrased text, or inline (not centrally managed) ✕ Gap = absent

2.1 Business model & licensing

#	Legal Requirement	Applicable Authority	RAV Platform Implementation	Status

1	Platform must not act as real estate broker	FL § 721.20, CA DRE / B&P § 11003.5, NY RPL § 442, most state broker-licensing statutes	DEC-034 establishes "marketplace facilitator" posture in code/docs. Platform never negotiates terms; Hosts and Guests contract directly. **However**, current `Terms.tsx:115-122` (Section 8) does not contain the verbatim Disclaimer 8.3 non-broker / non-agent language; the language present is a generic "intermediary" line. No `About.tsx` page exists in the codebase.	🟡 Partial — posture is correct in architecture but **not in disclaimer text**; needs Disclaimer 8.3 placed verbatim in ToS + new About page.
2	Platform must not facilitate timeshare sales	FL § 721.11, CA B&P § 11003.5	No validation on `ListProperty.tsx` or any listing-creation edge function rejecting sale-language listings. No keyword filter for "for sale" / "deed transfer" / "ownership transfer" / "buy my timeshare". Disclaimer 8.2 ("No Timeshare Sales") is **absent everywhere** (homepage, listing pages, header/footer).	✕ Gap
3	License number collection & display for commercial operators	FL § 721.20, CA DRE, HI § 514E, NV NRS 119A, AZ ARS § 32-2197	No `host_type`, `license_number`, `license_state`, or `license_verified_at` columns on `profiles` table. No conditional UI in `ListProperty.tsx` for license collection. No display of license on `PropertyDetail.tsx` or `OwnerProfileCard.tsx`.	✕ Gap (depends on host-type classification — row 13)

2.2 Payment, escrow, and tax

#	Legal Requirement	Applicable Authority	RAV Platform Implementation	Status
4	Fund segregation (no commingling with operating funds)	FL § 721.08, CA B&P § 10145, HI § 514E-9	**Stripe Connect destination-charge model** — Guest funds enter Stripe's custody and never land in a RAV-controlled bank account. Verified in `process-escrow-release/handler.ts:262-273` and `create-stripe-payout/handler.ts:156`. Architecture documented in `docs/payments/PAYSAFE-FLOW-SPEC.md` (DEC-038) and defended in `docs/payments/PAYSAFE-COMPLIANCE.md` (DEC-039). Test coverage: `process-escrow-release/handler.test.ts:199-228`, `verify-booking-payment/handler.test.ts:69-83`.	✓ Implemented (counsel should confirm this satisfies FL § 721.08 / CA § 10145 / HI § 514E-9 in writing)

5	Disbursement timing (after check-in, not before)	FL § 721.08, escrow-licensing avoidance principle	5-business-day post-checkout hold via `system_settings.escrow_hold_period_days = 5` (Migration 068, configurable). `auto-confirm-checkins` cron + `confirm-checkin` edge function (Session 63, Gaps A & B closed). Release gated on (checkout + 5 days) AND no open disputes AND no admin hold. Tests: `process-escrow-release/handler.test.ts:70-117, 167-197, 262-299`.	✓ Implemented
6	Refund processing within 5 business days	Guest Protection Policy commitment + UDAP statutes	`process-cancellation/handler.ts:130-163` (full refund issued immediately on Host cancellation) and `process-dispute-refund/index.ts:101-120` (Stripe `refunds.create` on dispute resolution). Stripe processes within 5–10 business days per card-network rules.	✓ Implemented
7	Tax collection & remittance	South Dakota v. Wayfair (2018); ~40+ state marketplace-facilitator statutes	Stripe Tax integration wired (`create-booking-checkout/handler.ts:247` `automatic_tax: { enabled: STRIPE_TAX_ENABLED }`), tax codes set (`txcd_99999999` lodging, `txcd_10000000` service), `tax_amount` line item per DEC-022. **Default OFF** in DEV+PROD, blocked on issue #127 (LLC/EIN). `AdminTaxReporting.tsx` tracks monthly collection.	◍ Partial — engine ready, activation blocked on business formation; **no admin field tracking marketplace-facilitator state-by-state registration status**; no automated remittance (manual until Avalara/Puzzle.io integration, #63 / #65, both blocked on #127)

2.3 Required disclaimers (Legal Dossier Section VIII)

#	Legal Requirement	Applicable Authority	RAV Platform Implementation	Status

8	Marketplace Disclaimer (8.1) — homepage, footer, all listing pages	All jurisdictions; UDAP / FTC § 5	**Not present in any of the three required locations.** No central disclaimer registry exists.	✕ Gap
9	No Timeshare Sales Disclaimer (8.2) — homepage, all listing pages, header/footer	FL § 721.11, CA B&P § 11003.5; FTC v. Carroll (2026) enforcement context	**Not present in any of the four required locations.**	✕ Gap
10	Non-Broker / Non-Agent Disclaimer (8.3) — ToS, About page	FL § 721.20, CA DRE, broker-licensing statutes	`Terms.tsx:115-122` Section 8 contains generic "intermediary" wording — not the verbatim non-broker / non-agent text from Section VIII. No `About.tsx` page exists.	✕ Gap (text is wrong, About page doesn't exist)
11	Tax Disclosure (8.4) — checkout, booking confirmation	All jurisdictions with applicable taxes	`Checkout.tsx:366-384` displays a paraphrased disclosure: *"Applicable occupancy taxes and transient lodging taxes for [state] will be calculated and collected at payment. Rent-A-Vacation collects and remits taxes as a marketplace facilitator where required by law."* — missing "included in the total price" and "on behalf of Hosts". Not in `BookingSuccess.tsx` or booking-confirmation email.	◍ Partial — present in 1 of 3 locations and **not verbatim**
12	Cancellation & Refund Policy (8.5) — listing pages, checkout, booking confirmation	All jurisdictions	`<CancellationPolicyDetail />` renders **per-listing** policy on `PropertyDetail.tsx` and `Checkout.tsx:417-422`. **Platform-level disclaimer text** (the Section VIII 8.5 paragraph stating policies vary, RAV fee is non-refundable except for Host cancellation/fraud, and full refund within 5 business days for Host cancellation) is **not present** anywhere. Not in `BookingSuccess.tsx` or booking-confirmation email.	◍ Partial — per-listing policy yes, **platform-level policy text no**
13	Limitation of Liability (8.6) — ToS	All jurisdictions	`Terms.tsx:115-122` text is **wrong** — it's generic intermediary language, not the 12-month platform-fee cap with exclusion of indirect/incidental/special/consequential/punitive damages required by Section VIII 8.6.	✕ Gap (wrong text)

14	Florida-Specific Disclosure (8.7) — all FL listing pages, FL checkout (geo-targeted)	FL § 721.20	**Not present.** The `listings` table has no `state` / `jurisdiction` column, so geo-targeted rendering is architecturally impossible today. Issue #466 ("PaySafe Gap I — jurisdiction field on bookings + per-state disclosure logic") tracks this work but is Tier B and blocked on #80.	✕ Gap
15	California-Specific Disclosure — all CA listing pages (geo-targeted)	CA DRE, CA B&P § 11003.5	Same as 8.7 — no state field on listings; no CA-specific text drafted; same blockers (#466, #80).	✕ Gap
16	Escrow / Fund-Holding Notice (8.8) — payment flow, checkout, booking confirmation	FL § 721.08, CA § 10145, HI § 514E-9 (advisable everywhere)	`Checkout.tsx:317` shows only a trust badge: *"PaySafe — funds held in escrow until check-in"*. The required Section VIII 8.8 paragraph ("…processed by Stripe, a licensed payment processor… segregated account… not commingled… does not act as an escrow agent…") is **not present anywhere**. Not in `BookingSuccess.tsx` or booking-confirmation email.	◍ Partial — concept gestured at, full text absent
17	Trademark / Affiliation Disclaimer (RAV-specific, 9th disclaimer beyond Legal Dossier)	Trademark prudence; brand-owner enforcement risk	Present in `Footer.tsx` per PR #479 (commit `97bee70`) — names Hilton/Marriott/Disney/Wyndham/Bluegreen/Hyatt/Holiday Inn Club/WorldMark and declares "independent secondary marketplace, not affiliated with…". **Inline, not centrally managed.**	◍ Partial — text correct, but architecturally an anti-pattern (inline)

2.4 Consumer protection

#	Legal Requirement	Applicable Authority	RAV Platform Implementation	Status

18	Guest Protection Policy (full refund within 5 business days for Host cancellation within 30 days of check-in) — displayed on listing + checkout	UDAP statutes (all jurisdictions); platform-Guest contract	`docs/support/policies/refund-policy.md` documents the policy (lines 20–30, 109–116) and the underlying refund logic exists in `process-cancellation/handler.ts`. **No Guest-Protection-Policy product surface** (no badge / banner / dedicated page) on `PropertyDetail.tsx` or `Checkout.tsx`. The protection is real in code; the consumer-facing promise is not surfaced.	✕ Gap (logic Implemented, surface absent)
19	Listing accuracy reporting mechanism (pre-booking)	Palmer v. FantaSea Resorts (NJ App. Div. 2025)	**No "Report Inaccuracy" / "Report Listing" CTA on `PropertyDetail.tsx`.** The existing `ReportIssueDialog` requires a `bookingId` (post-booking only). Pre-booking accuracy complaints have no intake.	✕ Gap
20	Fraud reporting & response	FTC § 5; wire-fraud statutes; FTC v. Carroll (2026)	No "Report Fraud" CTA. No `suspected_fraud` or `fraud` value in `dispute_category` enum (`database.ts:2405-2413`). No fraud-specific admin queue or escalation path documented in code.	✕ Gap
21	MLA Notice + arbitration carve-out for active-duty servicemembers	Steines v. Westgate Palace (11th Cir. 2024); 10 U.S.C. § 987	Zero matches across the codebase for "Military Lending" / "MLA" / "active duty" / "servicemember" / "10 U.S.C. § 987". `Terms.tsx:131` mentions "binding arbitration" with **no MLA carve-out**. No checkbox at signup or checkout.	✕ Gap

2.5 Host classification & monitoring

#	Legal Requirement	Applicable Authority	RAV Platform Implementation	Status

22	Host type classification (Type 1 Casual / Type 2 Multi-Property / Type 3 Commercial)	FL § 721.20, CA DRE, HI § 514E, NV NRS 119A, AZ ARS § 32-2197 — drives whether a Host needs a real estate / rental license	No `host_type` column on `profiles`. Onboarding (`SignUp.tsx`) only distinguishes `property_owner` vs `renter` role; no questions about properties owned or rental frequency. `owner_verifications.trust_level` is trust-based, not host-type-based. Membership tiers (Owner Pro / Owner Business) are subscription products, not host-type classifications.	✕ Gap
23	Rental frequency monitoring (commercial-threshold flagging — Type 1 > 6 listings/yr; Type 2 > 12 units/yr; Type 3 in FL/CA/HI/NV/AZ blocked without license)	FL/CA/HI/NV/AZ licensing statutes	No `compliance_status` field on `profiles`. No nightly cron flagging Hosts at thresholds. Cron infrastructure exists (Migration 073: `auto-confirm-checkins`, `sla-monitor`) — pattern is reusable. `successful_stays` / `total_bookings` exist on `owner_verifications` (trust system), not disaggregated by 12-month window.	✕ Gap (entire domain absent; building blocks present)
24	State-level licensing gate (block listing creation in FL/CA/HI/NV/AZ for unlicensed Type 3 Hosts)	FL § 721.20, CA DRE, HI § 514E, NV NRS 119A, AZ ARS § 32-2197	No state-based blocking logic in `ListProperty.tsx`. No state field on listings (depends on row 14 fix).	✕ Gap

2.6 Identity & ownership verification

#	Legal Requirement	Applicable Authority	RAV Platform Implementation	Status
25	Host identity verification (government-issued ID)	Fraud prevention; FTC § 5	Stripe Connect Express KYC runs for every Host (`create-connect-account/handler.ts:79-89`). `owner_verifications.kyc_verified`, `kyc_provider`, `kyc_reference_id` columns exist (`src/types/database.ts:1126-1187`). `OwnerVerification.tsx` allows manual government-ID upload (line 56). **No dedicated Stripe Identity / Persona integration**; manual upload has no automated verification or listing-creation gate. Counsel should advise whether Stripe Connect KYC alone satisfies the platform-level identity-verification requirement.	◍ Partial — Stripe Connect KYC yes; dedicated Identity provider no; listing-creation gate no

26	Resort ownership verification (proves Host actually owns the timeshare interest)	Fraud prevention; consumer protection	The **Pre-Booked proof workflow** (Migration 064, `ProofVerifyDialog`, `listing-proofs` bucket) verifies a *current reservation/booking confirmation* — **not** ownership of the underlying timeshare interest. No deed / membership-cert / points-statement upload. No resort-API integration.	🟡 Partial — reservation proof yes; **timeshare-ownership proof no**

---

3. Architectural recommendations folded into the audit

3.1 Disclaimer registry (architecture is itself a compliance requirement)

Compliance Brief Section 3.5 requires disclaimers to be "centrally managed so that when legal counsel recommends changes to disclaimer language, a single update propagates to all locations." Today, the only deployed disclaimer (PR #479 trademark/affiliation) is hardcoded inline in `Footer.tsx`. The proposed architecture:

- `src/lib/disclaimers/registry.ts` exporting versioned constants for all 8 (+1 trademark) disclaimers, each with `text`, `version`, `lastUpdated`, `legalReviewRequired`, `reviewedBy`, `reviewedDate`, `requiredLocations[]`
- `<DisclaimerBlock id="8.X" variant="full|compact|minimal" />` React component pulling from the registry
- Optional `<FloridaDisclaimerBlock propertyState={...} />` wrapper that renders 8.7 only when `propertyState === 'FL'`
- Mirror in `supabase/functions/_shared/disclaimers.ts` for booking-confirmation emails
- Once counsel sign-off is in hand on the `legal_review_required` policy docs (`docs/support/policies/*.md`, blocked on #80), promote the registry from "self-authored verbatim from Legal Dossier v3" to "counsel-reviewed v1.0"

This architecture must exist before any of disclaimer rows 8–17 above can be marked Implemented.

3.2 Stripe Pay Safe — counsel sign-off needed in writing

The Pay Safe / Stripe destination-charge architecture (rows 4 + 5 above) is the single most consequential compliance choice in the platform. RAV truthfully does not hold consumer funds. **Counsel should provide a written opinion** that this architecture satisfies FL § 721.08, CA B&P § 10145, and HI § 514E-9 escrow / trust-account requirements — and that no separate escrow license is required for RAV. This opinion belongs in the `docs/payments/PAYSAFE-COMPLIANCE.md` "Counsel Sign-off" section (currently a structured placeholder).

3.3 Marketplace facilitator registration

A separate operational workstream (not pure code): RAV must register as a marketplace facilitator in

40+ states with applicable lodging/sales taxes. Pre-launch admin work; engineering deliverable is a small admin tab tracking registration status per jurisdiction. Counsel + tax-pro should confirm the list and the order.

---

4. What we will build before counsel meeting (build-now)

The following items are **unambiguous code work** based on verbatim Legal Dossier Section VIII text and the founder's go-ahead. They are scheduled to ship with tests on the `dev` branch this week so the next revision of this dossier shows them as Implemented:

1. Central disclaimer registry (`src/lib/disclaimers/registry.ts`) + `<DisclaimerBlock />` component with all 8 + trademark disclaimers seeded from Legal Dossier Section VIII verbatim text (substituting "Stripe" for `[Payment Processor Name]` in 8.8). Footer #479 trademark disclaimer migrated to the registry.
2. Disclaimers placed in their required locations: 8.1 (homepage / footer / listings), 8.2 (homepage / listings / header-footer), 8.3 (ToS — replacing the wrong text in `Terms.tsx:115-122`; About page deferred until About page exists or copy lands inside another always-on page), 8.4 (Checkout / BookingSuccess / booking-confirmation email — replacing the paraphrased text), 8.5 (listings / Checkout / BookingSuccess / email — alongside the per-listing `CancellationPolicyDetail`), 8.6 (ToS — replacing the wrong text in `Terms.tsx:115-122` with the 12-month-fee-cap text), 8.8 (payment flow / Checkout / BookingSuccess / email — replacing the "PaySafe" badge).
3. **State field on `listings` table** (migration) — derived from `resort.location.state` for resort-linked listings, freeform input otherwise — so 8.7 geo-targeting becomes possible.
4. **Florida-Specific Disclosure (8.7)** rendered conditionally on `listing.state === 'FL'` in `PropertyDetail.tsx` and `Checkout.tsx`.
5. **California-Specific Disclosure** placeholder in the registry (text to be written by counsel; rendering wired identically to 8.7).
6. **"No Timeshare Sales" listing-form validation** — keyword filter on title/description in `ListProperty.tsx` plus server-side check in the listing-creation edge function.
7. **MLA Notice + arbitration carve-out** — checkbox at signup ("Are you active-duty military?"), conditional MLA notice text at checkout, and the verbatim carve-out paragraph added to `Terms.tsx:131` arbitration clause.
8. **Listing-accuracy reporting CTA** on `PropertyDetail.tsx` — new `ListingAccuracyReportDialog` distinct from the post-booking `ReportIssueDialog`, plus admin queue.
9. **Fraud reporting CTA** — adds `suspected_fraud` to `dispute_category` enum and surfaces a dedicated "Report Fraud" entry point.
10. **Guest Protection Policy product surface** — dedicated page + badge on `PropertyDetail.tsx` and `Checkout.tsx` referencing the verbatim 8.5 protection language.
11. Each item ships with at least one Vitest unit / integration test, per the project's tests-with-features policy.

After these ship, the scoreboard above is expected to move from 3 / 9 / 23 (Implemented / Partial / Gap) to roughly 14 / 6 / 15. Items remaining in the Gap column will be host-type classification (row 22), commercial-threshold monitoring (row 23), state-level licensing gate (row 24), license-number collection & display (row 3), dedicated Stripe Identity (row 25), timeshare-ownership verification (row 26), and the marketplace-facilitator state-by-state registration tracker (row 7) — all of which need counsel input on **scope and threshold** before implementation begins.

---

5. Where we need counsel input

#	Question for counsel	Affects audit row(s)
C1	Does the Pay Safe / Stripe destination-charge architecture (RAV never holds funds) satisfy FL § 721.08, CA B&P § 10145, and HI § 514E-9 escrow / trust-account requirements without RAV obtaining a separate escrow license? Written opinion requested.	4, 5
C2	Does Stripe Connect Express KYC alone satisfy platform-level identity verification, or is dedicated Stripe Identity / Persona required?	25
C3	Does RAV need to register as a "timeshare resale broker" under FL § 721.20 for **rental-only** listings, or qualify for an exemption? Same question for CA DRE oversight (B&P § 11003.5 + § 17550 Seller-of-Travel), HI Chapter 514E, NV NRS 119A, AZ ARS § 32-2197.	1, 3, 22, 23, 24
C4	For Type 1 / 2 / 3 Host classification thresholds: are 6 listings/year (Type 1 → Type 2 trigger), 12 units/year (Type 2 → Type 3 trigger), and "6+ units = Type 3" the right thresholds? Should they be calibrated per state?	22, 23
C5	For the FL/CA/HI/NV/AZ state-level licensing gate on Type 3 Hosts: should listing-creation be hard-blocked, soft-warned, or routed to manual admin review? What's the legal exposure of each?	24
C6	What proof of timeshare-ownership is acceptable: deed copy, membership certificate, points statement, resort confirmation letter, or a combination? Same for each restricted state?	26
C7	What is the correct state-by-state list for marketplace-facilitator tax registration, and what's the priority order? Should an admin field track this in-app?	7
C8	The 8 policy drafts at `docs/support/policies/*.md` (privacy-policy, booking-terms, payment-policy, trust-safety-policy, insurance-liability-policy, subscription-terms, refund, cancellation) are at `status: draft` blocked on #80. Will counsel draft these or review founder drafts?	1, 10–17, 18

C9	Does the verbatim disclaimer text in Section VIII of Legal Dossier v3 remain counsel-approved, or are revisions expected? (We are shipping verbatim text now under the founder's "build-now" go-ahead; the central registry is designed for one-line text updates.)	8–17
C10	The CA-specific disclosure equivalent to FL Disclaimer 8.7 — what verbatim text should we render on California listings?	15
C11	MLA carve-out paragraph language — is the verbatim language we'll add to the arbitration clause (e.g., "For active-duty servicemembers and their dependents, disputes arising from any consumer credit transaction are not subject to mandatory arbitration; 10 U.S.C. § 987 governs.") sufficient, or does counsel want to draft?	21
C12	Recent legislative items in Legal Dossier Section V (FL HB 1537 effective 2026-01-01, CA AB 2992 effective 2026-07-01, HI SB 3090 effective 2026-01-01, NV SB 440 effective 2025-10-01 *registry safe harbor*, NY A 8421 effective 2026-01-01, TX HB 3821 effective 2025-09-01, IL SB 2294 effective 2026-03-01, CO HB 24-1175 effective 2026-01-01) — which are already in effect and what compliance moves does counsel recommend?	scope-defining

6. Two compliance gaps from the 2026-05-04 internal review still open

The PR #479 commit body referenced "three pre-launch compliance gaps surfaced in the 2026-05-04 operating-model + brand review." Only the trademark/affiliation footer disclaimer (#479) has been closed. The other two — **CC&R** / **rental-restriction attestation in owner onboarding** and **`robots.txt`** / **scraping policy** — are mentioned in the #479 body as "tracked separately" but **do not appear to have been filed as standalone GitHub Issues yet** (search of open issues returned only #257 "Audit scraped resort data for compliance," which is a related but different concern). Recommend filing both before counsel meeting so they are visible.
